Company Overview 公司简介

Newhaven Display is a leading global display company that produces electronic display products for a wide variety of markets and applications. Our products include cutting edge LCD, VFD and OLED technologies, and we design and manufacture electronic display products found in all major industries such as Cell Phone, Medical Devices, Auto, Appliance, and Industrial Equipment. Our mission is to provide the highest quality display products, development tools and design services to our customers in a timely manner that meets their needs, promotes growth, and increases customer satisfaction. Newhaven Display 是一家全球领先的显示公司, 为各类市场和应用生产电子显示产品。我们的产品包括尖端 LCD, VFD 和 OLED 技术, 我们设计和制造电子显示产品在所有主要行业, 如手机, 医疗设备, 汽车, 智能家居和工业设备等等。我们的使命是及时为客户提供最优质的显示产品、开发工具和设计服务, 以满足客户的需求, 促进增长, 提高客户满意度为准责。

About the Job 关于职位

This position is for a self-starter willing to learn multiple facets of our business within the production sector of our company. The successful candidate will work closely with our suppliers and engineers to ensure our quality standards are maintained. This would include methodically measuring, collecting data, sharing, and training supplier staff to resolve problems. 此职位适合愿意在我司生产部门中进行多方面学习的主动、独立思考者。成功的候选人将与供应商和工程师密切合作, 以确保我们的质量标准得到保障。包括按程序测量、收集、分享数据, 培训供应商员工以解决问题。

- Some on-site training at Newhaven Display, North American Headquarters, may be required. 有机会在 Newhaven Display 北美总部进行部分现场培训。

Responsibilities 职责

- Perform mechanical & electronic test verification during build processes to confirm end product compliance. 在生产过程中执行机械和电子测试验证以确保最终产品合规。
- Monitor manufacturing documentation to ensure proper work instructions are being used to meet Newhaven Display standards. 监督生产记录以确保生产部门使用正确的作业指导书来满足 Newhaven Display 要求的标准。
- Improve inspection specifications and plans for suppliers' IQC department. 为供应商 IQC 部门检验规范和计划提供建议。
- Provide timely training and guidance to inspectors/suppliers to ensure the highest quality. 向供应商和检验人员及时提供培训和指导以确保达到最佳质量。
- Observe production line procedures and inspect outgoing shipments. 观察生产线程序并安排验货。
- Coordinate logistics of new or special projects. 协调新项目或者特殊项目的物流。
- Review product specifications for completeness. 检阅产品规格书之完整性。
- Interact with engineering and production to solve quality or process problems. 与工程部和生产部互动解决质量或流程问题。
- Track and confirm the supplier's corrective action report and implementation. 追踪及确认供应商改善计划报告和执行。
- Analyze and handle any non-conformance (defect) found during inspection, require suppliers to provide 8D reports, and track and confirm countermeasures to avoid recurring problems. 对所有检验中发现的不良进行评估和处理, 要求供应商提供 8D 报告, 追踪及确认对策以避免重复问题。

Requirements (要求)

- Technical Degree or higher: 3-10 years relevant work experience or manufacturing related background with knowledge of ISO standards. 大专学历以上: 3-10 年在相关 ISO 体系机构的工作或生产经验。
- 3 years or more of working experience in LCD or CTP module development, process or quality control management or reliability. Ability to read and interpret schematic diagrams. 3 年以上 LCD 模组或 CTP 开发、制程质量可靠性管理工作经验。有能力阅读和解释原理图。

- Rich experience with the quality control of LCD, TFT, VFD, OLED, CTP products. Familiar with the corresponding manufacturing process and quality control points. LCD, TFT, VFD, OLED, CTP 产品质量管控方面有丰富的检验，熟悉于各产品制程和质量管控点。
- Familiar with tools and methods used in quality analysis, able to use quality tools such as 7 methods in QC, CPK, etc. 熟悉质量问题分析的工具和方法，能够运用 QC 七大手法，CPK 等质量工具
- Good English and Chinese communication skills, CET Level 4 or higher. Working knowledge of electronics theory, and the ability to read English technical material and communicate with global team. 良好的英语和汉语沟通能力，英语 CET 四级以上。电子理论的应用知识，阅读英文技术资料并能够与全球团队交流合作。
- Able and willing to teach Quality standards to supplier staff. 有能力并愿意向供应商员工提供品质标准培训。
- Must be able to work independently with limited supervision. 必须能够在有限的监督下独立工作。
- Familiar with Word, Excel, and MS Office tools. 熟练 Word, Excel, MS Office 工具。
- Able to travel long and short term (mainly East and South China). 能适应长短期的出差或外派（主要区域在华东地区和华南地区）

Experience (经验)

- Prototyping or developing test fixtures or demo equipment is a plus. 有原型设计或开发测试架及演示设备经验者优先。
- Software programming experience with Assembler or C++ is a plus. 有 Assembler 或 C++ 编程能力者优先。
